I respectfully urge the FCC to please reject NAB's petition 04-160. The continuous traffic and weather updates on XM satellite radio are a terrific help to me before I leave home for my 20 mile commute to work. XM offers a station strictly devoted to traffic and weather that is not available elsewhere. I do not have to wait 8 or more minutes, or for the commercial to finish, before I hear the current road conditions and weather forecast. I pay XM for the variety it provides and feel that what I choose to listen to should not be dictated to by the National Association of Broadcasters. Thank you.
